

BIBLIOGRAPHY FOR A PRESENTATION ON GEOMETRIC STATISTICS / BIBLIOGRAPHIE POUR UNE PRÉSENTATION EN STATISTIQUE GÉOMÉTRIQUE

Juin/June 2011

1-R.A. Fisher

- Fisher, R.A., *Dispersion on a sphere*. (1953). Proc. Roy. Soc. London Ser. A., 217: 295-305
- WATSON, G. S. 1983. *Statistics on Spheres*. Wiley, New York.

2-Correlation

- STEPHENS, M. A. (1979). Vector correlation. *Biometrika* 66, 41-8.
- Jupp, P.E. & Mardia, K.V. (1980) A general correlation coefficient for directional data and related regression problems. *Biometrika* 67,163-173.
- Rivest, L.-P. (1982). Some statistical methods for bivariate circular data. *Journal of the Royal Statistical Society Series B-Methodological*, 44 (1), 81-90
- FISHER, N. I. & LEE, A. J. (1983). A correlation coefficient for circular data. *Biometrika* 70, 327-32.
- N. I. Fisher and A. J. Lee (1986) Correlation coefficients for random variables on the sphere and hypersphere. *Biometrika*, 79, 159-166
- Jupp, P.E. (1987) A non-parametric correlation coefficient and a two-sample test for random vectors or directions. *Biometrika* 74, 887-890.
- Mardia, K.V. & Jupp, P.E. (2000) *Directional Statistics*, Wiley, Chichester.
- Jammalamadaka SR, Sengupta A (2001). *Topics in Circular Statistics*. World Scientific.

3-Spherical regression

- Chang, T. (1986) Spherical regression. *Annals of Statistics*, 14, 907-924
- T. Chang, Estimating the relative rotation of two tectonic plates from boundary crossings. *J. Amer. Statist. Assoc.* **83** (1988), pp. 1178–1183
- Rivest, L.-P. (1989). Spherical regression for concentrated Fisher-von Mises distribution. *Annals of Statistics*, 17 , 307-317
- Kim, P.T. (1991) Decision theoretic analysis of spherical regression. *Journal of Multivariate Analysis* **38**, 233-240 (1991)
- T. Chang, Spherical regression and the statistics of tectonic plate reconstructions. *Internat. Statist. Rev.* **61** (1993), pp. 299–316

4-Quality assurance

- Chapman, G.R Kim, P.T. (1992). Quality assurance and spherical regression. *ASA Proceedings of the Section on Engineering and Physical Systems*, 5-13 (1992)
- G.R. Chapman, D.G. Chen, P.T. Kim, F. Hulting, K. Tsui, L.P. Rivest (1995) Assessing geometric integrity using spherical regression techniques. *Statistica Sinica* **5**, 173-220 (1995)

- G.R. Chapman (1995), Perturbation Analysis for an Orthogonal Least-Squares Estimator. *Canadian Journal of Statistics*
- CHANG, T. D., & KO, D. (1995). *M*-Estimates of Rigid Body Motion on the Sphere and in Euclidean Space. *Ann. Statist.*, 23, 1823–1847.
- Rivest, L.-P. (1998). Some linear models for estimating the motion of rigid bodies with applications to geometric quality assurance. *Journal of the American Statistical Association*, 93 (442), 632-642
- Chen, Gemai and J. Chen. (1998) "Geometric Quality Inspection" *Statistica Sinica* 8 135--149

5-Modeling rotation matrices

- DOWNS, T. D., (1972). Orientation statistics. *Biometrika*, 59, 665–676.
- M.J. Prentice. (1986) Orientation statistics without parametric assumptions. *Journal of the Royal Statistical Society (Series B)*, 48:214-222, 1986.
- Prentice, M.J. (1989). Spherical regression on matched pairs of orientation statistics. *JRSS B* 51, 241-248.
- Day, J.S., Murdoch, D.J. and Dumas, G.S. (2000). Calibration of position and angular data from a magnetic tracking device. *Journal of Biomechanics*, **33**, 1039-1045.
- RAN COURT, D., RIVEST, L. P. AND ASSELIN, J., (2000). Using orientation statistics to investigate variations in human kinematics. *Appl. Statist.* 15, 39–50.
- RIVEST, L.-P. & CHANG, T. D., (2006) Regression and correlation for 3x3 rotation matrices. *Canadian Journal of Statistics*, 34 , 187-202.
- LEÓN, C., MASSÉ, J.-C. and RIVEST, L.-P. (2006). A statistical model for random rotations. *J. Multivariate Anal.* **97** 412–430.
- Shin, H.H., Takahara, G.K. and Murdoch, D.J. (2007). Optimal designs for calibration of orientations. *Canadian Journal of Statistics*, **35**, 365-380.

6-The ankle joint

- BOGERT, A. J. VAN DEN, SMITH, G. D., & NIGG, B. M., (1994). "In Vivo Determination of the Anatomical Axes of the Ankle Joint Complex: an Optimization Approach," *Journal of Biomechanics*, 27, 1477–1488.
- PIERRYNOWSKI, M. R., FINSTAD, E., KEMECSEY, M. and SIMPSON, J. (2003). Relationship between the subtalar joint inclination angle and the location of lower-extremity injuries. *J. Amer. Pediatr. Med. Assoc.* **93** 481–484.
- LEWIS, G. S., SOMMER, H. J. and PIAZZA, S. J. (2006). In vitro assessment of a motion-based optimization method for locating the talocrural and subtalar joint axes. *J. Biomech. Eng.* **128** 596–603.
- RIVEST, L. P., BAILLARGEON, S. & PIERRYNOWSKI, M.R., (2008). A directional model for the estimation of the rotation axes of the ankle joint. *Journal of the American Statistical Association*. 103, 1060–1069.
- LEWIS, G. S., COHEN, T. L., SEISLER, A. R., KIRBY, K. A., SHEEHAN, F. T. and PIAZZA, S. J. (2009). In vivo test of an improved method for functional location of the subtalar joint axis.

J. Biomechanics **42** 146–151.

- Haddou, M. Rivest, L.-P. and Pierrynowski, M. A non-linear mixed effects directional model for the estimation of the rotation axes of the human ankle. *Annals of Applied Statistics*, 4, 1892-191
